Memorandum of Understanding

Memorandum of Understanding, MOU 10-2015

Between

The City of Lavon, Texas

And

The Nevada Volunteer Fire Department

This Memorandum of Understanding (MOU) sets forth the terms and understanding between the City of Lavon (City) and the Nevada Volunteer Fire Department (NVFD) to provide fire protection, rescues, fire prevention, emergency management and emergency medical services to the City of Lavon.

Background

For over 15 years, the NVFD has been the sole provider of fire and emergency medical services, not including patient transport to the City. The City has been very satisfied with the service provided and costs associated with that service. The agreement was based on a "handshake" and has proven beneficial to both parties.

Purpose

This MOU will establish a time frame for the current working arrangement, renewal dates, expectations and goals.

The above goals will be accomplished by undertaking the following activities:

- Primary response to all emergencies, 24 hours per day, 7 days per week
- Emergency medical care for patients inside the City limits.
- Fire Inspections as required
- Usual and customary care of the Fire Station building
- Cooperation with all city employee's
- Participation in the Emergency Action Plan (EAP) planning and implementation

It is acknowledged and understood that the NVFD is a volunteer fire department, with limited time and assets. It is further understood that emergency responses for the volunteer fire department will primarily come from places other than the station.

Reporting

The Fire Chief and/or President of the Nevada Volunteer Fire Department shall be responsible for reporting to the City of Lavon, Director of Health and Life Safety (DHLS). The Director of Health and Life Safety shall act as the liaison between the City and Fire Department. He/she

shall be responsible for oversight of the emergency response relationship between the City and the NVFD, as well as emergency planning, health, EMS control, and budget accountability. In the event of a disaster, the DHLS or his designee shall oversee all emergency operations as per the Incident Command System (ICS) for the City.

All communications between the City and NVFD shall be expected to flow through the DHLS.

Asset Purchase, Distribution and Use

Assets purchased by the City shall be identified as a city asset and shall remain as such. All items not identified shall be considered as property of the NVFD.

No city budgeted funds may be expended by NVFD without the express written approval of the DHLS.. "Consumable funds" allocated in the yearly budget will be paid to the NVFD in January of the budgeted year by way of City check. (Examples: Fuel, Stipend, Testing)

The City shall allow purchased assets to be used by the NVFD for the explicit purposes of fire prevention, fire extinguishment, emergency operations, emergency medical care and training. Personal use of City owned assets or equipment is not allowed.

Facilities

The City shall provide a station for fire trucks, equipment, personnel and training. It is expected that the NVFD provide a minimal level of usual and customary care for the facility. Primary responsibility of the NVFD shall be to keep the station operational, clean and presentable to the public. The City or its designee shall have responsibility for all maintenance, repairs, recurring monthly bills, appearance (interior and exterior) and remodeling as required.

Funding

This MOU is not a commitment of funds by the City of Lavon. Funding shall be established by the City Council as per the normal budgeting process each year. Any requests for funding shall be presented to the DHLS during the normal budget cycle for the following year, prior to passage of the new yearly budget each October.

Duration

This MOU is at-will and may be modified or cancelled by mutual consent of authorized officials from the City of Lavon and the Nevada Volunteer Fire Department by way of 6 months notice by either party. This MOU shall become effective upon signature by the authorized officials from both parties and will remain in effect until modified or terminated for cause by any one of the partners. In the absence of mutual extension agreement by the authorized officials from the City and the NVFD this MOU shall end on 5 years from the effective date. This MOU may be extended for a period of 5 years, if mutual agreement by both parties has been established and copies of this extension have been attached to the original document.

Unmatched Power, Reliability, and Performance

Stainless Steel Bird Screens included but not shown

- **100% Maintenance Free**, not just the siren, the whole system!
- **Non-Rotating**: Forget the worries of rotating sirens, this unit has only two moving parts.
- **Compatibility**: This siren will integrate seamlessly with most existing siren systems.
- **5 year Warranty****: available so you can rest assured your siren will be functional at all times.

ELECTRO-MECHANICAL SIRENS produce stronger and further reaching sound than electronic sirens while providing far better reliability.

OMNI-DIRECTIONAL DEVICES "...present a distinct advantage.. over rotational devices," according to FEMA's warning system guide. It says "a rotational device will have an overall lower dB level when assessed across a given time period than an Omni-directional device operating at the same frequency. " (4.4.5 FEMA OWS Technical Bulletin 2.0)

Further, the guide states: "Omni-directional sirens provide a greater area of coverage than do rotating or directional devices. They provide a more constant signal that improves public alerting..." (4.4.5 FEMA OWS Technical Bulletin 2.0)

The workhorse of our siren family is the 16V1T-B. With its low pitch sound and battery reliability, this true performer is meant for cities who want the peace of mind a battery siren provides. Priced to compete, this siren is 100 % FEMA and USDA grant compliant. This 16 Horsepower performer is rated at 125/129 dB(c) @ 100 ft. continuous*. This rating is not just for 25% of its cycle time, like its rotating competitors, the 125/129 dB measurement is for 100% of its full RPM run time. Plus, this 125/129 dB is available in a dual 460 Hz tone, the lowest pitch in the industry. Therefore, its sound will fade at a lower rate than its competitors, giving the user more distance per decibel. This pitch has been shown to stand up to wind fade and tree cover better than its high pitch competitors.

Perhaps the key feature of the 16V1T-B is the length of time that the siren will run on batteries. As is common in the Mid-West, storms

frequently come in lines over a 3 or 4 hour period. If your first storm knocks out power, you may need a siren which can be sounded 6 or 7 times before power is restored. The Sentry model 16V1T-B can sound 10 full 3 minute signals using its battery reserve; that's more than twice the reserve capacity of competitive sirens.

The 16V1T-B is also available in an AC/DC version, which provides AC primary with battery backup (true UPS) for users who want the additional power of an AC Siren. The AC/DC siren bumps the dB output to 129 dB(c) when on AC power due to its increased power output. The 16V1T-B's exposed siren components are of powder coated metals, providing the most durable finish available. The siren can be upgraded to Stainless Steel for use in harsh environments. The 16V1T-B is a state of the art siren created with tried and true technology. Add a Gen-3 radio controller for the ultimate outdoor warning system.
